

Dear Colleagues,

We are currently preparing for the ***Tenth International Conference on Antimicrobial Agents in Veterinary Medicine (AAVM)***, to be **VIRTUALLY** on November 23-25, 2020. This forthcoming conference follows the success of the past nine AAVM held in Helsinki, Ottawa, Orlando, Prague, Tel Aviv, Washington DC, Berlin, Budapest and Rome. This conference has emerged as one of the leading meetings in its field, which provides a very intensive program and encourages communication among the attendees.

The antimicrobial use is still a common practice in farm and companion animals, notwithstanding the efforts towards an overall reduction and the promotion of a responsible use. Antimicrobial use generally increases the risk of resistance formation and the interconnections of animal and human use may increase the risk for human health. Alternatives to these drugs are increasing, but still not routinely available. The veterinary medicine has to deal with the ever increasing requirements of reduction of antimicrobial use especially in farm animals, the lack of effective therapy alternatives and a more evidence based guidance in antimicrobials therapies. These aspects and many others, such as, pharmacokinetics, pharmacodynamics, PK/PD modelling, antimicrobial resistance, residues, analytical methods, clinical trials, environmental impact, etc. will stay in the forefront of the topics of the AAVM programs. A strong interaction will be encouraged to promote discussion and participation on these topics between the speakers and attendees.

Veterinary use of antimicrobials has raised worries for the potential of resistance transfer from animals to humans. Antibiotic resistance is often caused by the misuse and/or overuse of antibiotics, as well as poor infection prevention and control. Steps can be taken to limit the transmission of resistance, and also to prevent and control the spread of infections. Research on new and alternative antimicrobial molecules, early detection of diseases, biosafety and control measures for infections in intensive farms will also be in the spotlight in the upcoming AAVM meeting as well.

Sponsors, company representatives and professional organizations are cordially invited to participate in this important international event. The Meeting is expecting over 300 participants.

Please see attached different sponsorship options available.

We look forward to welcoming online!

Sincerely,

Prof. Petra P. Cagnardi
Conference Chairperson

Prof. Stefan Soback
Conference past-Chairperson

MAJOR SPONSOR: 15,000 Euros

The following rights will be granted to the Sponsor of this category:

- Full color advert to be shown on the main screen of the virtual platform
- Company logo and acknowledgement to be included on the main screen of the virtual platform
- Company logo and acknowledgement on conference website
- 4 x conference registrations

SPONSOR: 10,000 Euros

The following rights will be granted to the Sponsor of this category:

- Company logo and acknowledgement on conference website
- Company logo and acknowledgement to be included on the main screen of the virtual platform
- 2 x conference registrations

CONTRIBUTOR: 5,000 Euros

The following rights will be granted to the Sponsor of this category:

- Company logo and acknowledgement on conference website
- Company logo and acknowledgement to be included on the main screen of the virtual platform

CONFERENCE APP: 2,000 Euros

The Conference App engages attendees with personalized planning tools and real-time event updates. The App includes the scientific program, abstracts, speaker info, participant lists, and a personalized scheduler.

The following rights will be granted to the Sponsor of this category:

- Logo to be included on the homepage of the app as 'sponsor of the app'
- Inclusion of company logo on the Conference website and final program book

LOGO ON WEBS PLATFORMS: 1,000 Euros

The following rights will be granted to the Sponsor of this category:

- Company logo and acknowledgement on conference website
- Company logo and acknowledgement to be included on the main screen of the virtual platform
